

Product Overview

Conductix-Wampfler Cables

CONDUCTIX
wampfler

Ⓞ DELACHAUX GROUP

Cables for systems in motion selected from experts

Advantage 1 Secure choice of cables

- Comprehension of our customers applications and needs is the foundation of our choice. We offer the complete package with systems and cables that match perfectly to your application.

Advantage 2 System compatibility

- The cable design significantly influences the performance of the energy and/or data supply system – we ensure the proper alignment of the cable to the system for optimized energy and data transfer.

Advantage 3 Manufacturer independence

- The performance of the cable is more important to us than its origin – we neutrally select only the most technically qualified cables available on the market. Additionally we conduct our own test scenarios on our systems to ensure best functionality.

Advantage 4 System guarantee

- Each complete Conductix-Wampfler system is provided with a comprehensive guarantee – this, needless to say, includes the cable.

Advantage 5 Conductix-Wampfler cable service

- Conductix-Wampfler services ensure the reliability of our energy supply systems and the availability of our customers equipment.

Conductix-Wampfler Cables for Festoon Systems

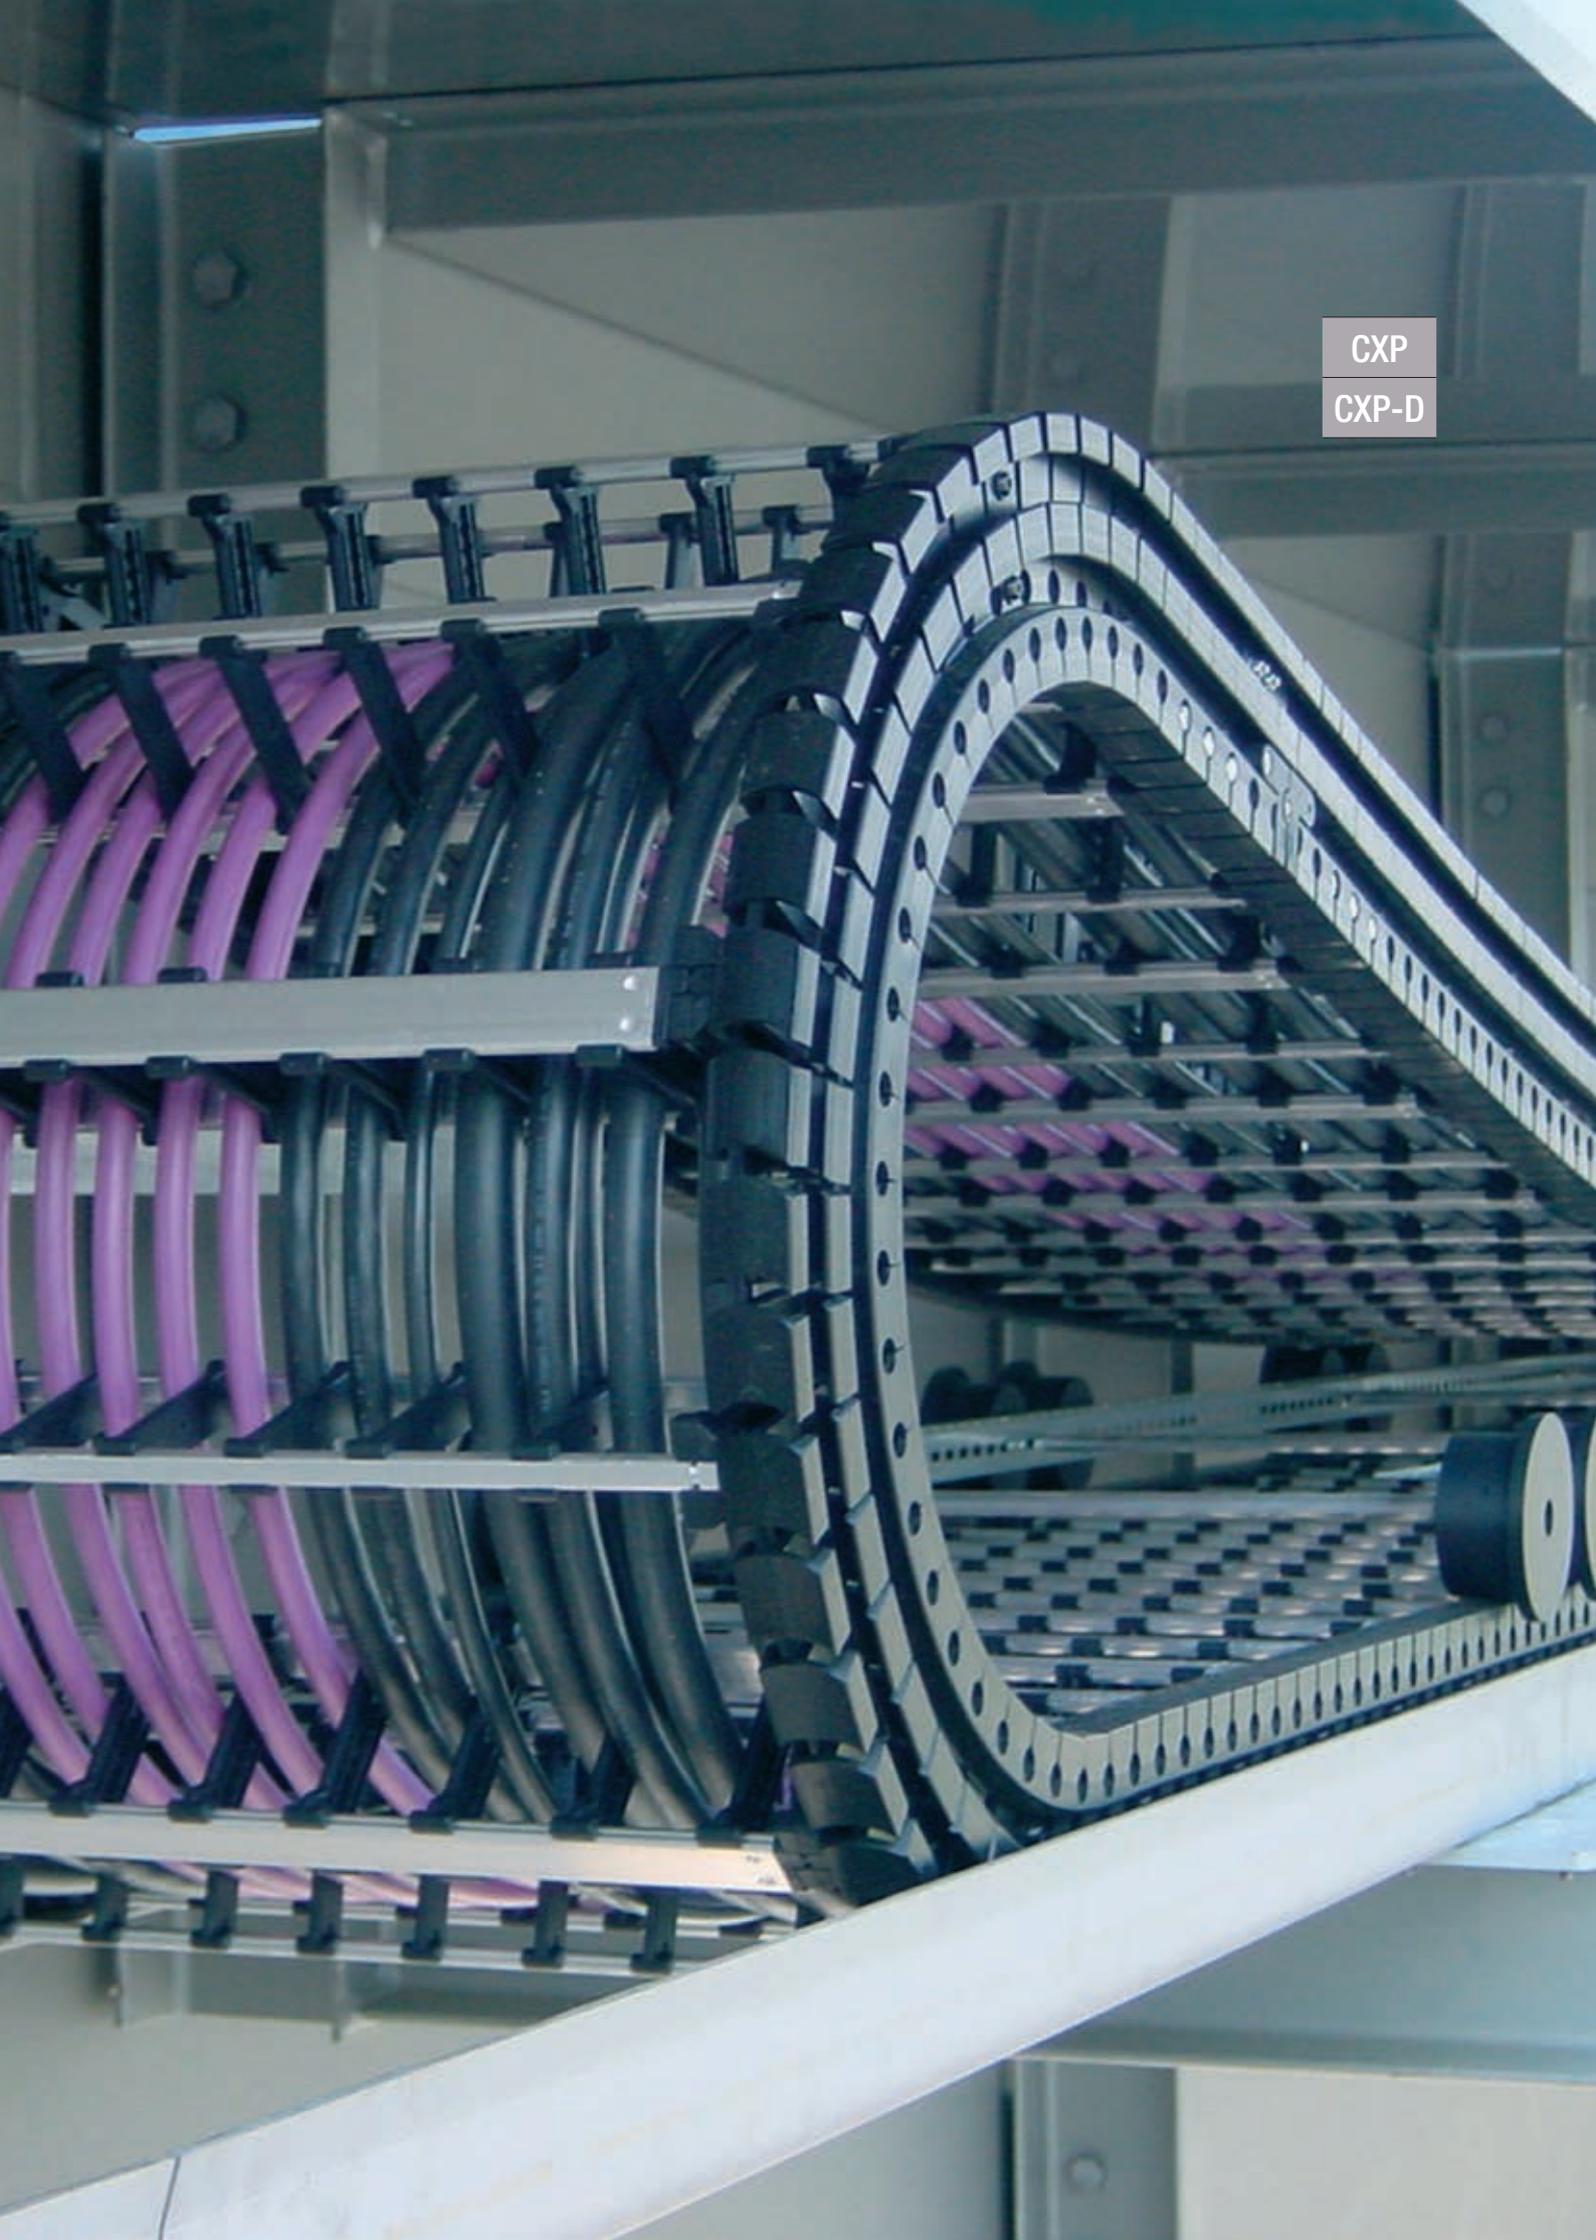

Special features of cables for Festoon Systems

- Low weight and small diameter due to a stranded layered conception. In the case of power cables, the earth conductor is split into three conductors.
- Resistant to alternating bending loads due to finely stranded conductors
- Sheathing compounds with very high resistance to outdoor atmospheric conditions
- Notch-resistant sheathing compounds with high resistance to tearing, highly resistant to stress caused by continuous bending at the bottom of the loop
- Robust outer sheath designed to absorb impact forces
- High axial rigidity and resilience due to pressure filled extrusion in interstices
- Highly resilient cables allow the smallest possible bending radius and therefore, short system lengths

Prominent places of particular impacts

CXP
CXP-D

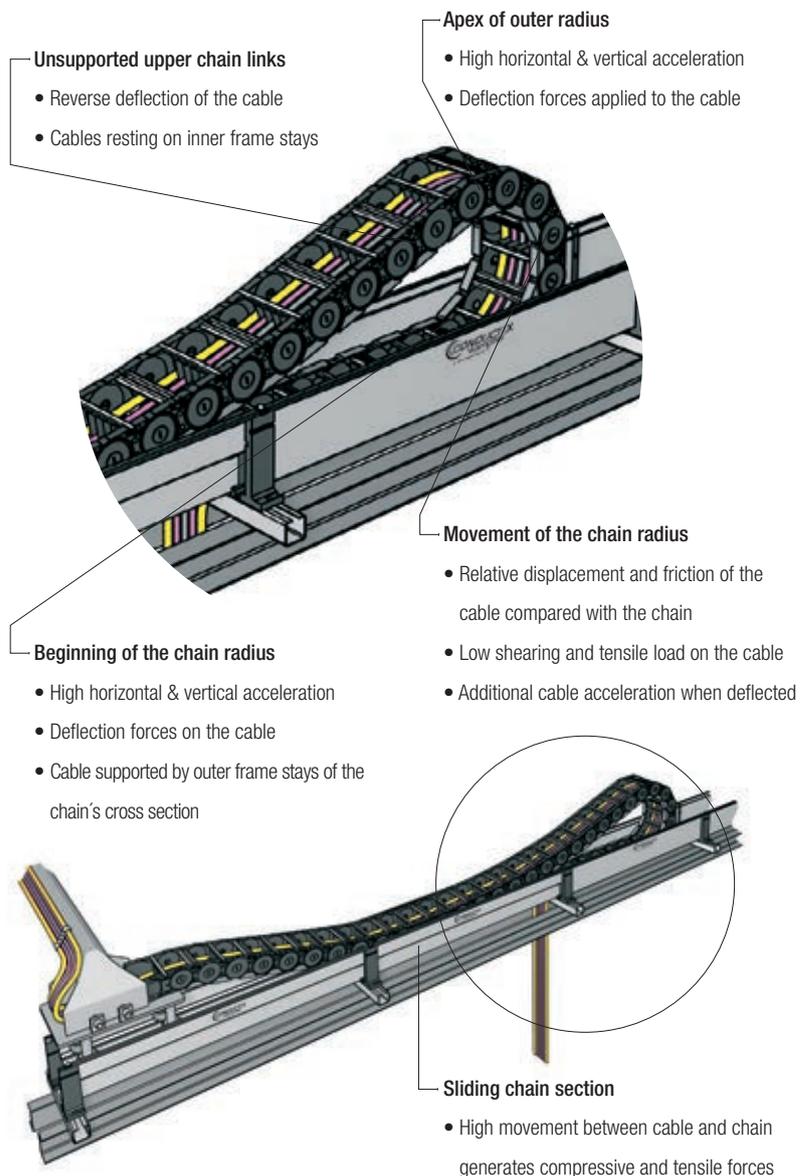

Conductix-Wampfler Cables for Energy Guiding Chains

Special features of cables for Energy Guiding Chains

- Low weight and small diameters as a result of particularly thin conductor insulation and sheaths
- Best insulation materials for small wall thickness
- Very high resilience due to short lay pitches (7 to 8 x Ø)
- Flexible sheath compound with high resistance to tearing and abrasion
- Resistance to corkscrews as a result of a stranding with reverse twist
- Extruded filler in interstices provides stable construction
- High wear resistance against chain material

Prominent places of particular impacts

Conductix-Wampfler Cables for Reeling Systems

Special features of cables for Reeling Systems

- Reduced diameter and weight as a result of ideal insulation and sheathing materials
- Better resistance to corkscrew due to reverse twist stranding
- Stable construction and geometry based on extruded fillers
- Outer sheath is highly resistant to wear even in aggressive environments
- Extremely high resilience thanks to a very short lay stranding
- High axial rigidity due to interlinked inner and outer sheaths
- All high voltage cables are produced with left-hand lay

Specialities (available on request)

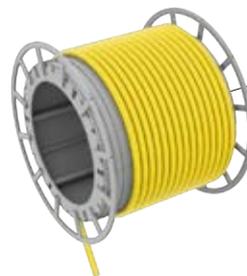

- Composite cables with power + control + fibre optics
- Cables with compounds for low temperature environments down to -50°C
- Cables with compounds and protection for very high temperatures up to 180°C
- Cables suitable for use in all kinds of water (e.g. drinking water, waste water etc.).

Prominent places of particular impacts

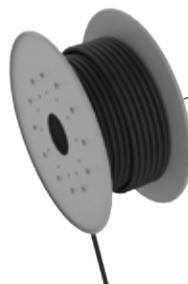

Monospiral winding reel

- High tensile loads can occur during winding
- Torsional stresses through the use of guiding pulleys
- High speed in combination with changing bending direction
- Reverse bending "S-type" due to mid feeding point
- Abrasion through the inner spokes of the drum body
- Temperature drops effect the cable jacket rigidity

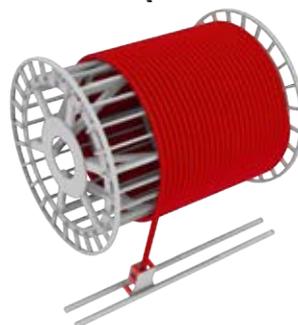

Spreader winding reel

- Very high tensile load from vertical pull
- The metal cleaves on the drum body may lead to abrasion
- Cable must withstand oil and grease
- Temperature drops effect the cable jacket rigidity

Random winding reel

- Random winding on the drum
- Smaller bending radii stress the copper conductors which need to be flexible

Level winding reel

- Torsion to the cable through the use of a special guiding device
- Bending via the special guiding device
- Winding of one layer has to be exact over the large width of the reel body
- Extreme ambient influences on the jacket (e.g. UV, ozone, coal dust, graphite)
- Max 2 layers on drum body because of heat emanation

Customized Service

Expertise

The breadth and depth of Conductix-Wampfler's service is geared to the requirements and desires of our customers. The service varies from consulting and project planning to long-term service contracts for complete systems for energy and data transfer.

Project planning

- Selection of suitable cables considering the installation and environmental requirements
- Calculation of our cables' ampacity for the respective application on request
- Complete selection of cables compatible with the specific system for energy and data transfer: correct cable lengths, physical dimensions, bending radii and tensile loads

Pre-assembly

- Assembly of cable packages onto cable-trolley systems; shipment on C-rails or I-beams for easier and faster final assembly
- Assembly of cables onto spring and motorized cable reels; shipment of complete assembly with cables connected to the slip rings
- Complete assembly of cable chain with cables; strain-reliefs optionally pre-assembled, shipments on special plug&play transport and assembly racks or wooden transport drums

Final assembly

- Complete installation as well as start-up operation carried out by trained and qualified personnel
- Acceptance together with the customer
- On site instruction and training

Inspection & Servicing

- Regular inspections of the facility coupled with expert service, increase the availability and reliability of every system

Questionnaire | Specification Data

Cables

Technical datas

On which energy transmission system is the cable used? Festoon System Reel Energy Guiding Chain

		Cable 1	Cable 2	Cable 3	Cable 4	Cable 5
Cable Designation						
Number of cores						
Cross section [mm ²]						
Length [m/ piece]						
Piece						
Cable type	flat					
	round					
Sheath Material	rubber					
	PVC					
	PUR					
	others					
Earth conductor	yes					
	no					
Screen	yes					
	no					

Is a combined solution preferred? yes no
 if yes: Power + Control Power + Control + Data (FO) Power + Data (FO)

Application Data

- Travel speed: _____ [m/min]
- Acceleration: _____ [m/s²]
- Max. perm. operating temperature of the conductor: _____ [°C]
- Ambient temperature: _____ [°C]
 in operation: from _____ [°C] to _____ [°C]
 static: from _____ [°C] to _____ [°C]
- Other special conditions concerning the installation [e.g. cable guide]: _____
- Inrush current / max. power: _____ / _____ [kVA] / 100% DC
- Rated voltage: U₀ / U: _____ / _____ [kV]
- Bending radius: _____ [mm]
- Tensile load: _____ [N]
- Installation: Horizontal Vertical Fixed installation
 Connecting to: _____

Data transfer | Screen | FO

- Profi Bus CAN-Bus Industrial - Ethernet Others
- What data has to be transferred?: _____
- Screen specification: Overall screen Pairs Individual
 FO, fiber type: 50/125μ 62,5/125μ E9/125μ
- Required data transfer rate: _____ [MBit/s]
- Number of fibers: 6 12 18 24

Operating Conditions

- Site: Indoors Outdoors Port Tropics Subtropics
- Degree of pollution: Little Medium Strong
- Aggressive media: Yes No
 Type: _____
 Concentration: _____
- Ambient Temperature: min. _____ [°C] max. _____ [°C]
- Humidity: _____ [%]
- Perm. wind speed during crane operation: _____ [m/s]
- Special chemical influences, e.g.
 Phosphates Sulphur Urea
- Other influences, e.g. Heavy pollution
 Type of pollution: _____
- Humidity Wetness Dust
 if yes, which type? Corrosive Not corrosive
- Very hot: _____ °C Very cold: _____ °C

Your Applications – our Solutions

Cables from Conductix-Wampfler represent only one of the many solutions made possible by the broad spectrum of Conductix-Wampfler components for the transport of energy, data and fluid media. The solutions we deliver for your applications are based on your specific requirements. In many cases, a combination of several different Conductix-Wampfler systems can prove advantageous. You can count on all of Conductix-Wampfler's Business Units for hands-on engineering support – coupled with the perfect solution to meet your energy management and control needs.

Festoon systems

It's hard to imagine Conductix-Wampfler cable trolleys not being used in virtually every industrial application. They're reliable and robust and available in an enormous variety of dimensions and designs.

Conductor rails

Whether they're enclosed conductor rails or expandable single-pole systems, the proven conductor rails by Conductix-Wampfler reliably move people and material.

Non-insulated conductor rails

Extremely robust, non-insulated conductor rails with copper heads or stainless steel surfaces provide the ideal basis for rough applications, for example in steel mills or shipyards.

Slip ring assemblies

Whenever things are really "moving in circles", the proven slip ring assemblies by Conductix-Wampfler ensure the flawless transfer of energy and data. Here, everything revolves around flexibility and reliability!

Motorized Cable & Hose Reels

Motorized reels by Conductix-Wampfler hold their own wherever energy, data, media and fluids have to cover the most diverse distances within a short amount of time – in all directions, fast and safe.

Spring Cable & Hose Reels

With their robust and efficient design Spring Cable and Hose Reels from Conductix-Wampfler are unbeatably reliable in supplying energy, signals, data and fluids to a vast range of tools, cranes and vehicles.

Inductive Power Transfer IPT®

The no-contact system for transferring energy and data. For all tasks that depend on high speeds and absolute resistance to wear.

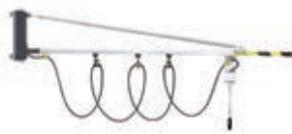

Retractors and Balancers

Our wide range of high reliable retractors and balancers remove the load from your shoulders and allow you to reach top productivity.

Energy guiding chains

The "Jack of all trades" when it comes to transferring energy, data, air and fluid hoses. With their wide range, these energy guiding chains are the ideal solution for many industrial applications.

Jib booms

Complete with tool transporters, reels, or an entire media supply system – here, safety and flexibility are key to the completion of difficult tasks.

Conveyor systems

Whether manual, semiautomatic or with Power & Free – flexibility is achieved with full customization concerning layout and location.

www.conductix.com

Conductix-Wampfler

has just one critical mission:

To provide you with energy and data transmission systems that will keep your operations up and running 24/7/365.
